ADDRESS OF WELCOME

Parents, Members of the Faculty, Fellow Students, and Friends:

As president of the Senior Class of 1964, it gives me great pleasure to welcome each and every one of you to our Class Day exercises.

Today, June 10, 1964, is a day to which we all have been looking forward with great anticipation. It denotes that our high school years have at last reached their successful culmination.

The feeling which each one of us has today is one of appreciation and gratitude, for we realize that this day might never have become a reality without the help of all of you throughout our school years.

We are very grateful to our understanding principal, Mr. Shaw, who was always willing to assist whenever the need arose.

We are also thankful to the members of the faculty and, of course, our loving parents, whose patience and guidance have helped us prepare for the problems of the future.

Our final and most sincere expression of gratitude can go to none other than God Himself Who gave us the wonderful opportunity to learn the truth, for, as our class motto states, we firmly believe that, "The Truth Shall Set You Free."

My classmates and I sincerely hope that you enjoy these Class Day exercises.

THERESA MADSEN

CLASS SONG

We stand united on this joyful day,
And we thank all of those who have shown us the way.
Now blest with knowledge and truth in our hearts,
We leave our school to tread our own and separate paths.

We shall remember the times good or bad,
As we bid our farewells with our hearts growing sad.
Though no one knows what the future will be,
We will remember that "the truth shall set you free."

CLASS HISTORY

The graduating class of 1964 invaded the halls of Millbury High on September 7, 1960. At that time (it doesn't seem so long ago now as we thought it would then) *Ben Hur* was the big thing in movies and Fats Domino and Brenda Lee were the number one and two pop song artists. A new junior high school was then under construction and Mr. Stephen Beaton was beginning his first year as superintendent of schools.

Our first duty as high schoolers was that of selecting our class officers for the coming year. We elected Nancy Burbank as class president; Elaine White for vice-president; Douglas Murray as secretary; Gregory Jordan as treasurer; and Sandra Poulin as class captain. At the same time we also elected two freshmen to represent our class on the Student Council. We chose Theresa Madsen and Douglas Murray for these important posts.

A good number of our freshman boys answered the call for football on the very first day of school. Among them were Kevin May, William Cobb, Louis Martinelli, William Poulin, John McSheehy, Richard Couture, Paul Graveline, John Lindberg, and Harry Taylor. Linda Morello was the freshman member of the cheerleading squad.

In the magazine drive in early October, the freshman class showed fine school spirit in taking in $1,251.34 for an average of $8.87 per pupil.

In early November, Nelson Roy was chosen as secretary of the French Club, and Ann Beauregard became the new secretary of the Dramatic Club. Later, Ann distinguished herself in that same club by becoming the only freshman to qualify for admission to the National Thespian Society.

Donna Andrews, Elaine Dufour, and Kathleen Howard joined the *Reflector* staff.

On December 23, 1960, we were dismissed for a much-needed Christmas vacation. School was resumed on January 3, 1961. Richard Couture, William Poulin, James Nault, Kevin May, and Henry Nicoletti represented our class on the J.V. basketball squad. Elizabeth Zemaitis was high scorer for the girls' varsity basketball team, scoring 180 points for a sizzling average of 15 points per game.

Ann Beauregard was picked as a member of the Massachusetts All-Star Cast for her performance in *Spring Formal,* and she also received the Best Thespian Award.

Peter Kotilainen won a gold medal for Superior Rating and John McSheehy won a silver medal for Excellence in the annual Massachusetts Speech Festival.

Four freshman boys made the baseball team in the spring. They were outfielders Kevin May and John McSheehy; catcher Jim Nault; and pitcher William Cobb.

Our summer vacation came on June 23, 1961.

We returned as sophomores on September 6th. Our first action, once again, was the selection of class officers. Theresa Madsen became president; Ann Beauregard was the new vice-president; Nancy Burbank became secretary; Douglas Murray, treasurer; and Richard Couture, class captain. Kevin May and Ann Beauregard joined Theresa Madsen and Douglas Murray as our representatives to the Student Council.

Ann Beauregard and Suzanne Carig joined Linda Morello on the cheering squad. Sophomores on the *Reflector* staff included Donna Andrews, Kathleen Howard, Linda Mathurin, Karen Hanson, Ann Beauregard, Nancy Burbank, Judith and Mary Colarusso, Linda Ham and Elaine Dufour.

On December 8th, the Dramatic Club produced the play *Quit Your Kidding* in which Ann Beauregard, John McSheehy, Virginia Wicklund, and Donald Young had prominent roles. Susan Maguire was the new Dramatic Club treasurer. Peter Kotilainen was elected secretary of the Debating Club. Kathleen Howard, Georgia Tucker, and Gale Remuck were chosen as twirlers for the school band.

On December 22, we recessed for a Christmas vacation and we returned refreshed on January 2nd.

Kevin May, Richard Couture, William Poulin, and John Allen made the varsity basketball team, while Shirley Erickson, Elaine Dufour, and Elizabeth Zemaitis were on the girls' squad.

On March 15, Richard Knapik received an honorable mention at the annual Science Fair.

Elizabeth Zemaitis led all scorers on the girls' basketball team for the second consecutive year with a total of 248 points.

Kevin May was fast becoming famous for his jokes in Miss Marlborough's English Class.

Three sophomore girls had their poems published in the *Anthology of High School Poetry*. They were Pat Dunn's "Wintertime," Kathleen Howard's "Serenity," and Elizabeth Zemaitis's "Books." Kathy's poem received a special mention award.

Towards the end of the year, we selected our ring committee. They were: Virginia Wicklund, Ann Beauregard, Suzanne Carig, and James Nault.

We were freed for the summer on June 22, 1962.

On September 5, we came back as juniors and decided to keep the same class officers as last year: namely president, Theresa Madsen; vice-president, Ann Beauregard; secretary; Nancy Burbank; treasurer, Douglas Murray; and class captain, Richard Couture.

The girls' hockey team was loaded with juniors: Elaine Dufour, Elizabeth Zemaitis, Shirley Erickson, Mary Colarusso, Barbara Rhodes, Gale Remuck, Karen Singel, Judith Colarusso, Camille Methot, Michelle Methot, Virginia Tumas, and Beverly DeSalvio.

Donna Andrews was elected treasurer of the French Club. Douglas Murray was vice-president of the Science Club, and Donald Ojerholm was treasurer of the same club. Henry Nicoletti was vice-president and Peter Kotilainen was secretary of the Debating Club.

Linda Ham, Kathleen Howard, Patricia Fox, Patricia Lague, Georgia Tucker, Barbara Rhodes, Yvonne Hebert, Louise Antaya, Judith and Mary Colarusso, Ruth Whitten, Nancy Burbank, Marcia Norbeck, Susan Maguire, Ruth Lyons, and Virginia Wicklund were all on the *Reflector* staff.

In early December, the Dramatic Club put on its production, *Mr. Co-ed,* in which John McSheehy, Donna Andrews, Barbara Rhodes, and Susan Maguire starred.

Gale Remuck was appointed head band majorette, and Georgia Tucker and Kathleen Howard were two of her twirlers.

Our Christmas vacation began on December 21, and we were brought back again on January 2, 1963.

In basketball Elizabeth Zemaitis again led all scorers on the girls' basketball squad with a total of 175 points and an average of 21.8 points per game. Second highest was Elaine Dufour with a 40-point total. Other juniors on the team included Shirley Erickson, Nancy Burbank, Janice Bernard, Janet Lee, and Gail McKeown. On the boys' team, Dick Couture was high man for the juniors and fourth man on the team with a total of 56 points. The other juniors on the team were Kevin May and John Allen.

In March, the annual Science Fair was held, and three junior boys, John O'Neal, Roger Grenier, and Leif Erickson, received each an honorable mention award.

At an assembly later in March, Donna Andrews, Douglas Murray, and Elaine White received the Horace Mann Award for scholastic excellence. This is the school's highest scholastic award.

New members of the Thespian Society were Virginia Wicklund, Donna Andrews, Barbara Rhodes, and Susan Maguire.

The Junior Prom Committee was elected in early April. It included: Sandra Poulin, Gregory Jordan, Patricia Lague, Ruth Lyons, Gail McKeown, Mary Faron, Judith Colarusso, Mary Colarruso, Theresa Madsen, Leonard Lebel, Patricia Fox, Douglas Combs, and Paul Johnson.

The prom, held on the seventh of June, was a great success. Elizabeth Zemaitis was chosen queen of the prom.

Nancy Burbank was the only junior to go to the Annual Student Council Spring Convention.

The junior girls were well represented on the softball team. Janice Bernard, Beverly DeSalvio, Elaine Dufour, Linda Mathurin, Juliann Renauld, Elizabeth Zemaitis, and Janet Lee were all on the varsity.

The National Honor Society, newly formed in our freshman year, claimed the following juniors as new members: Donna Andrews, Ann Beauregard, Judith Colarusso, Patricia Dunn, Peter Kotilainen, Douglas Murray, and Elizabeth Zemaitis.

For next year's athletic season, William Cobb and Kevin May were chosen as co-captains of the football team and Richard Couture and John Allen, co-captains of the basketball team.

Our summer vacation came on June 21.

On September 4th, 1963, we were seniors at last. The new officers were: Theresa Madsen, president; Elizabeth Zemaitis, vice-president; Elaine Dufour, secretary; Elaine White, treasurer; and John Allen, class captain.

Theresa Madsen was chosen as our D.A.R. good citizen.

The senior honor group was found to include Douglas Murray, Elaine White, Donna Andrews, Judith Colarusso, Nancy Burbank, Yvonne Hebert, Paul Graveline, Peter Kotilainen, Kathleen Howard, Paul Johnson, Ann Beauregard, Leif Erickson, Patricia Dunn, Ruth Lyons, and Camille Methot. Douglas Murray, Elaine White, Donna Andrews, and Judith Colarusso were the four highest scholastically and became the graduation speakers.

The class day speakers were selected as follows: Barbara Rhodes, class statistics; Paul Graveline, class history; Virginia Wicklund, class gifts; Elizabeth Zemaitis, class prophecy; Paul Johnson, last will and testament; and Patricia Fox, omissions and corrections.

In March, at the annual school science fair, Peter Kotilainen was the first place winner with his cloud chamber. Judith Colarusso, Mary Colarusso, and Kathleen Howard took second place with their artificial kidney, and Richard Knapik was third.

Donna Andrews was named editor-in-chief of the *Reflector,* and the department editors included: Judith Colarusso, Henry Nicoletti, Kathleen Howard, Douglas Murray, Nancy Burbank, Paul Graveline, Suzanne Carig, and Patricia Dunn. Also on the staff were Louise Antaya, Mary Colarusso, Leif Erickson, Patricia Fox, Linda Ham, Yvonne Hebert, Paul Johnson, Richard Knapik, Patricia Lague, Ruth Lyons, Theresa Madsen, John McSheehy, Barbara Rhodes, Virginia Wicklund, Peter Kotilainen, Susan Maguire, Marcia Norbeck, and Elaine White.

Elizabeth Zemaitis finished her final basketball season in her usual fine style. Her record-breaking four-year point total was 850 points. Elaine Dufour had 214, Shirley Erickson had 89, and Nancy Burbank tallied 54.

On the boys' team, Dick Couture had a season's total of 188 points for a 10.5 per game scoring average. Kevin May was second with 169 points for a 9.4 average. John Allen, William Poulin, and James Nault were all very close behind. This team will always be remembered for its dramatic upset sweep of the Clark Tournament in Worcester, where our seniors again turned in great performances.

The Thespian Society chose Barbara Rhodes as its president and Susan Maguire as secretary.

Douglas Murray and Elaine White were repeats for the Horace Mann once again this year.

Douglas Murray was elected president of the Student Council; Donna Andrews, vice-president; Theresa Madsen, secretary; and John McSheehy, treasurer.

Douglas Murray was again honored on October 18, when he was elected president of the National Honor Society. Other officers were Peter Kotilainen, vice-president; Donna Andrews, secretary; and Elizabeth Zemaitis, treasurer.

The Dramatic Club elected officers on October 23. They included John McSheehy, president; Donald Young, vice-president; Donna Andrews, secretary; and Susan Maguire, social chairman.

Patricia Fox was elected secretary, and Elaine Dufour and Sandra Poulin were elected treasurers of the Library Service Club.

Peter Kotilainen became president of the Debating Club, while Henry Nicoletti was his secretary.

The photography committee included Douglas Murray, Kevin May, Louise Antaya, Suzanne Carig, and Richard Couture. Loring Picture Studios of Worcester was their choice for our class pictures.

The *Aftermath* staff included Judith Colarusso as editor-in-chief and her assistant editors were Ann Beauregard and Henry Nicoletti while the associate editors were Peter Kotilainen and Barbara Rhodes.

Richard Knapik was named a semi-finalist in the National Merit Scholarship Qualifying Test.

On December 6, the Dramatic Club produced its annual play *No More Homework* in the high school auditorium. Among the seniors who gave unforgettable performances in this comical story were: Leif Erickson, Patricia Fox, Donald Young, Barbara Rhodes, Paul Johnson, Donna Andrews, and Kenneth Perkins.

The *Aftermath* business staff was headed by Mary Colarusso, business manager. Those who helped her were Elizabeth Zemaitis, Kevin May, Paul Graveline, and Paul Johnson.

The boys' baseball team headed to a great season this year. Seniors on the squad included John Allen, Kevin May, James Nault, and William Cobb.

On the track team we found Dick Couture, William Poulin, Louis Martinelli, Paul Graveline, Nelson Roy, Douglas Murray, Donald Ojerholm, Alfred Grenier, Robert Howard, and Leif Erickson.

The girls' softball team sported fine seniors, Elaine Dufour, Janet Lee, Elizabeth Zemaitis, Janice Bernard, Beverly DeSalvio, Shirley Erickson, Juliann Renauld, Linda Mathurin, and Virginia Tumas.

Where did I leave my copy of *T.V. Guide?* Ah! There it is, on the television set. Let me see what program sounds most interesting. Hmm. Here we are—*The Barry Moore Show,* August 6, 1976, 7:30 P.M.

Click—Good evening, ladies and gentlemen, and welcome to tonight's really big show. Our special show will feature a sparkling array of newly discovered talent. But before we begin, we'll have a word from our sponsor, Jennie Cammuso's home baked bread.

And now, on with the show. First I'd like to introduce to you Europe's most exciting juggling sensation, Robert and Kathleen Howard. This fine young team is instructed and assisted by Italy's own Louis G. Martinelli.

Olympics. They are gold medal winners Harry Taylor, Robert Roe, Stephen Witkowski, Karen Hanson, Kevin May, and Joseph Rogers.

Now impatiently waiting to be introduced are the famous Clark Clowns. This hilarious group was originally established by none other than Alana Clark. Let's really hear it for Raymond Hurd, Camille Methot, John O'Neal, Ralph Soucy, Barbara Rhodes, Donald Young, and Robert Sharron!

As a specialty act for the kiddies, we have arranged a unique puppet show. These hand-carved characters were created by James Nault. Tonight, however, they will be operated by Stanley Harackiewicz, Arline Grenier, Roger Butler, Warren Catherwood, and Beverly DeSalvio.

We interrupt this program to bring you a special news bulletin. Our cameras are at Cape Kennedy where our one-the-spot team of reporters, Janice Bernard, Yvonne Hebert, and Malvin Edwards, have the story. At 6:15 P.M. a crew consisting of six men safely returned to earth after a successful twenty-four hour stay on the moon. Members of the crew are Steven Anderson, Douglas Murray, David Yuknavich, Peter Kotilainen, Kenneth Hamilton, and Richard Lagerholm. All crew members are reported in fine physical condition. Now back to our regularly scheduled program.

Now we present a sensational singing group that surpasses The Beatles. This new group of singers who call themselves The Grasshoppers were organized through their world renowned music teacher, Terrence Anderson. Let's have a big hand for Paul Johnson, Louise Antaya, Mary Faron, John Lindberg, and Robert Bailey.

I'm sure you'll find the performers in our next act most exciting. Let's welcome the Colarusso Canines. Their lovely trainers are Judith Colarusso and her assistant Linda Ham.

Now a word from Patricia Brady about her magic message. This new beauty lotion was formulated by the Ruth Lyons' Cosmetic Corporation.

Out in our audience we have the scientific team that was recently accredited with the cure of cancer. They are Doctor William Poulin, Doctor Calvin Taft, and Doctor James Stokowski. Also in our audience is Miss Theresa Madsen who is presently engaged at the New York Philharmonic Opera House.

I am proud to present Elaine Dufour and her Dare Devils in a spine tingling act. These young ladies defy death and danger. Susan Hazelwood will do a triple backward somersault on a tight rope, Carol Burns and Patricia Lague will wrestle a live alligator, and Karen Singel will be shot out of a cannon through a hoop of flames.

After a word from Kathleen Hines about her fifty-seven varieties of soup, we will have the exciting conclusion to tonight's program.

We are privileged to have with us a fine group of Shakespearean actors who will be opening next week on Broadway. They will be presenting for us tonight a scene from *A Midsummer Night's Dream*. The presentation will feature Leonard Lebel, Laura Williams, Gail McKeown, Marilyn Provencal, Cynthia St. Germain, and Nelson Roy.

Our program tonight was directed by Robert Englund. Executive director was Gerard Berthiaume. Choreographer was Donald Kendall. Music was by Michelle Methot, Lee Barter, and Claire Boudreau. Screen setting was by Nancy Burbank and Lorraine Myers. Make-up was by Shirley Erickson, Brenda Burl, and Dorothy Naleski. Costumes were created by Ronald Dulmaine and Gail Brodeur. This has been a Paul Morin-Edwin Nelson Production.

Before concluding this evening's show, I would like to make a special announcement. Tonight you have been introduced to many outstanding people who have distinguished themselves in various fields of endeavor. These people, I am proud to say, were all in the 1964 graduating class at Millbury Memorial High School, Millbury, Massachusetts.

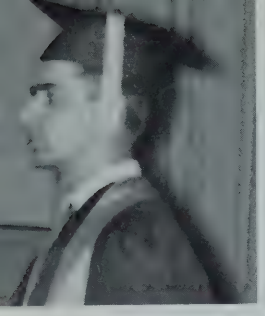
Prophecy

I had been watching the numerous Olympic meets on television one Sunday afternoon when the women's javelin contest commenced. As the crowd at the stadium began to cheer, I heard the announcer introduce my former classmate, Elizabeth Zemaitis, whom the United States was depending upon to win a coveted gold medal.

Although the other contestants were outstanding, who broke all records? Why, the famous girl athlete of Millbury Memorial High School, class of '64—our own "Liz" Zemaitis, of course.

PATRICIA FOX



THE RISE OF EDUCATED EDUCATION

"Don't stop to think; tell me what you know!" Years ago a teacher was overheard telling this to a student. Unwittingly she had summarized the entire philosophy of educational systems of the past—Don't think; memorize. During the short time that has elapsed since then, a technological revolution has been sweeping through the educaional system of America.

This revolution is taking place right before our eyes. It has been most obvious in the superficial changes, such as language labs, accordion partitioned gymnasiums, or green blackboards; but the real changes are taking place inside people's heads. They can be seen in the way a teacher approaches her task, in the way a textbook presents a subject, in the way a student comes to grips with a problem.

Each year the number of children entering school increases. Never has there been a generation of beginners with so much to learn, and never has there been a generation of adults so willing and eager to teach them. The reasons for this enthusiastic trend, very simply stated, are the cold war, automation, and a sudden renewed concern for our public schools on the part of university scholars.

The tense relations with the Soviet Union have convinced many Americans that our schools are an important weapon in the cold war. Only by upgrading our scholastic standards to insure a well-educated public of the future can the continued safety and prosperity of a strong democracy be insured.

The requirements of the new technological age also emphasize the need for an improved system. The constant change in the demands and skills of jobs reflect the new techniques and processes that are continually being developed. Automation and other technological developments will require schools to develop conceptual rather than manual skills.

In the past, university scholars weer strangely cut off from public schools. For instance, a college mathematics professor was unaware of how children in elementary schools were being taught arithmetic. But as they began to retrace the educational paths of the students and visit the schools, it became evident that a change was long overdue. There was a drastic need for more correlated approaches, where the ideas developed through education could be applied. In other words, there was a need for *educated* education.

Everywhere educators began asking questions which challenged traditional methods of teaching. Should there be just one teacher for every classroom in elementary schools? This condition requires a teacher to be almost super-human in the mastery of all fields of knowledge.

Should children of the same age share the same classroom? It has been pointed out that if students were grouped by intelligence instead of age, the faster learners could proceed through school at a more rapid rate and take advanced courses, while the less capable pupils could receive the help they need when they need it. This proposal is based on the American idea that every child has the right to be educated to the limit of his abilities.

Should teachers be drillers, drumming rules, dates, and proofs into the students? Psychologist B. F. Skinner calls this sort of humdrum drilling "white-collar ditch digging." He suggests that teachers arouse the students and inspire them to think. The job of drilling can be left to teaching machines. About five thousand schools are already using this new technique called programed instruction. Such a program has the physical appearance of a workbook and acts something like a personal tutor. When properly used it can achieve astounding results. At Manhasset Junior High School, in New York, for example, students using a programed text learned a year's worth of grammar in just twelve hours! If the drilling can be done this efficiently by programed study, then teachers will be free to take on more creative tasks.

The answers to such questions open the door to other experiments which are playing havoc with the standard school timetable. Children are being taught algebra and geometry in the second grade; kindergarteners are learning French; and fourth graders are studying poetry. Most of these practices are in the experimental stage, but some will, no doubt, find their way into schools from coast to coast.

Yet these innovations in the curriculum timetable are not as drastic as the revisions of the curriculum's contents. Old subjects are giving way to the new mathematics, the new physics, the new geography, the new biology, and the new grammar. The two elements which make them "new" are emphasis on basic principles and emphasis on discovery. A student is taught to grasp the underlying principles of a subject as opposed to learning only the facts. In math, for example, he must still learn that two plus two equals four; but, in addition, he must now learn why he gets this total and the principles involved. A grammar student must learn the structure of the language as well as the difference between a noun and a verb.

The new curriculum also aims to teach a student how to learn. He must use reason to make his own discoveries and think critically. It has come to the point where a teacher today will say, "Don't just tell me what you know; think!"

This idea of teaching students to think is rapidly spreading through our schools. It is certainly the most significant trend in education today, for, as a French proverb puts it, "Everything the child learns in school he forgets; only the education remains."

DOUGLAS A. MURRAY

THE DROPOUT PROBLEM IN OUR COUNTRY

What is a dropout? A dropout is a pupil who leaves school for any reason before graduation.

Dropouts themselves give two reasons for leaving school: financial need and dislike of school. Financial need may include anything from contributing to the support of the family to buying a hot rod, and dislike of school is nearly as inclusive. A dropout may say that he dislikes school because he is discouraged with his academic progress or dislikes a certain subject; or he may mean that he sees no practical value in the subjects he is studying.

Investigators have found that low scholastic aptitude is characteristic of most dropouts. They are often grade repeaters; they fail early, most often in the first four grades.

The education of the parents is an important factor in the dropout problem. It has been found that those whose parents have had some college are hardly ever dropouts, and that those whose parents have completed high school also drop out very seldom.

The largest proportion of dropouts comes consistently from the lowest social classes in terms of father's education, family income, family possessions, the family's standing in the community, and its participation in community activities.

The outcome is, of course, that dropouts have a staggeringly high rate of unemployment—twice that of high school graduates. In October, 1959, one out of every four dropouts (ages sixteen and seventeen) was out of work, in contrast with one out of every eight graduates. Dropouts earn an average of twenty-seven dollars per week less than graduates, and the disparity increases as they get older.

An estimated four out of every ten students in the fifth grade will not even finish high school, and that is a waste we cannot afford. There is no reason why one million young Americans, out of school and out of work, should all remain unwanted and untrained on our streets when their energies could be put to good use.

Unskilled in a world where unskilled jobs are fast disappearing, these youths are doing themselves permanent harm. By 1970 in our state there will be only one unskilled, low-paying job available for every five youths with less than a high school education. School dropouts are going to find it harder and harder to get any type of work. With automation and technological change there are fewer and fewer jobs for unskilled workers. So, it adds up to the fact that the dropout will find himself in the dullest of occupations or in the ranks of the unemployed.

In recognition of education's responsibilities, the National Education Association, under a grant of $185,000 from the Ford Foundation, has instituted Project: School Dropouts. The purpose of the Project is to establish for a three-year period consultations, recommendations, and programs dealing with the problem of dropouts.

The NEA, which is the nation's largest professional organization, represents 860,000 American educators. It is hoped that through it some of the dropouts may decide to continue on in school. It is estimated that 300,000 young people may decide to drop out this summer. Members will devote a few hours a day to showing these youths what can happen to them and what they owe to themselves and their country.

Two generations ago our immigrant grandfathers came to an America where there was a great demand for unskilled workers. Even a generation ago the majority of our working people did not have a high school education. But today the situation is dramatically different. If some of the dropouts are not prepared to supply the skilled manpower of the future, our country will inadequately meet the challenges it faces. As the United States is the leader of the Free World and on the threshold of its most exciting pioneering experience, the conquest of space, the prospective dropout is needed. Because the dropouts represent an important part of our future manpower, we are fortunate in having the cooperation of the National Education Association.

The growing number of dropout programs and studies now under way in state and national organizations shows the growing concern for this problem across the country. Many cities have begun stay-in-school campaigns, and such national organizations as the Chamber of Commerce and the American Legion have adopted resolutions encouraging their local groups to study the problem. In Worcester we have a Mayor's committee studying the dropout and unemployment problem.

Also, I might add that education is a process that continues long after school days are over. Through it we gain three essentials: knowledge, judgment, and discipline; each of which is very important to a mature person. The high school graduate has gained the self-confidence that comes from a developed sense of judgment, giving him powers and privileges the ignorant will never have.

ELAINE WHITE

POVERTY — THE THORN IN OUR NATION'S SIDE

Picture a two-and-one-half room clapboard house in a run-down neighborhood. There is no heat. Burlap covers the windows to shut out the cold. A double bed, small dresser, and three backless wooden chairs crowd for space in the front room. A broken mirror tilts against one wall. In the back are another double bed and a cot. A neat stack of dirty clothes lies in the fireplace. Sunday clothes are carefully hung on nails in the walls. There are no closets. The young couple are twenty-five and twenty-seven years old. They have eight children, the oldest only ten years old. The husband has a city job which pays fifty-seven dollars a week. Seven dollars of this goes to pay the rent each week.

Granted, this is an extreme case of poverty. However, it is indicative of the crucial problem which faces our nation today. There are people in our nation who have never seen a tree, never had a new suit of clothes, or never had a room all to themselves. They are in the minority, but they constitute 20 per cent of the United States population.

President Johnson feels that all families who have an income of less than three thousand dollars per year can be classified as "poor" or "deprived." An income of this size makes it impossible for a family to meet its basic needs.

What are the causes of poverty? What contributes to its expansion in society? The primary cause of poverty is the lack of education. A person without a high school education today is lucky to get any type of job. Yet, 64 per cent of all "poor" families are headed by persons with less than an eighth grade education. It is virtually impossible for them to earn enough money to meet their families' needs.

Automation has also caused an increase in the number of poverty-stricken families. Jobs previously handled by men are now done by machine. The number of unemployed rises and, as a result, more people find it difficult to exist. About 430,000 people seek relief in New York each day. Nearly eight million Americans are receiving public aid worth $400,000,000 each month.

Even if the Negro today attains a college education, he may work as a janitor, a housekeeper, or an elevator operator. Why? Because of the racial discrimination which exists in our nation today. Nearly 44 per cent of all Negroes, or a total of two million families, have annual incomes of less than three thousand dollars. It is often said, "Where there's a will there's a way." But *is* there a way for the Negro to combat this prejudice against education and job opportunities for his race?

Geographical environment also has a bearing on poverty. Take Appalachia, for instance. It was once an active coal mining area. That is, until most of the people lost their jobs because of the rise in automation and competing fuels. Now it is America's number one depressed area, her largest and most stubborn rural slum. Disease flourishes here; hospital facilities are gravely inadequate. The children seldom attend school; illiteracy is extremely high. But the people seldom complain, for they have never known anything better.

What can be done to combat poverty? We can see to it that the children in poverty-stricken areas are properly educated. Those male youths over eighteen and out of school should be drafted into military service. There they will get the opportunity to further their education and learn a trade. When they re-enter the civilian world, they will do so as self-supporting individuals, *not* as future burdens on the taxpayers. The retraining programs which are being instituted in many areas of our nation will help men put out of work by automation be useful again.

Better housing and hospitals should be constructed. These will give the people new hope and incentive to make new lives for themselves.

We must also help to eliminate the racial discrimination which is so prevalent in our nation today. We should treat all men as brothers, regardless of race, creed, or color, and see to it that everyone has equal educational and occupational opportunities.

Poverty has always been a problem. There has always been a class of people who have been unable to meet their needs. We need to realize that poverty is *not* the problem of only the poor. It is the problem of every American.

We cannot eliminate the poor class entirely. But we *can* give its people a chance to make decent lives for themselves. We can see to it that poverty is no longer passed on from generation to generation. We can let the poor know that we are vitally concerned with their welfare. We can let them know that we care.

DONNA ANDREWS

"PEACE THROUGH UNDERSTANDING"

These are rapidly moving times, and, especially today, we find ourselves being rushed along without actually realizing what is happening around us. At a time like this a person must take himself aside and ask himself a few basic questions—Why am I here? Do I have a purpose in life? Will my future mean anything to the future of this country? It is now that we must find the answers to these questions, before we step out into this world of problems. With the right answers we will survive and achieve happiness. With the wrong ones we will lose our sight and fall among the forgotten of the world.

All is not good in this world of ours. There is an overabundance of poverty, greed, crime, and sickness. They have existed since the beginning of man and will probably remain until the end of time. We must live with them. But before we do, we must understand them. For then and only then will we be able to rise above them.

"All men are created equal; . . . they are endowed by their Creator with certain unalienable rights; . . . among these are life, liberty, and the pursuit of happiness." These are not difficult words to understand. They were not composed for a select few. They were simply written in behalf of men who were tired of tyranny and who were establishing a nation where no man would be handicapped by the color of his skin or the nature of his beliefs. Unfortunately it has not been as easy as that. The last fifteen years have brought great conflict despite these promises. We have been engaged in a life or death battle against prejudice. Equality has been fading; men are no longer judged by their abilities but rather by their color and class. When did this begin? When did we lose sight of our nation's foundation?

Ever since our country began, equality has been the backbone of all our ideals. It has served as a friend when in trouble and a goal when in war—a guarded gift, a symbol to other nations. Yet there are so many Americans who, through prejudice, have ignored equality. The primary element in the destruction of a nation has found its way, before our eyes, into our country and is dragging Americans by the thousands down with it.

Where have we seen its damage? Consider a recent example, the opening of the World's Fair.

"Its preparation took four long years. Alphabetically, it runs from Africa to Westinghouse. Geographically, it encompasses 640 acres of New York. Financially, it represents an investment of over one billion dollars." But none of these yardsticks, alphabetical, geographical, or financial, can measure the enormous amount of shame it bestowed upon the United States.

President Lyndon B. Johnson, leader of this nation and elected by Americans, came to New York in order to attend the ceremony for the opening of the World's Fair. He asked for no more than the respect of all present. He stood up to speak but could not be heard. The chanting and screaming of the Civil Rights Demonstrators hung over the Fair like a storm. The national anthem was played, and the flag of the United States of America was raised, but they continued singing their freedom songs. Bystanders cursed them, violence broke out, Americans fought against Americans. In sight of all this, President Johnson shouted, "With God's help and His blessing we will move forward to a world in which all men are equal, in which all people are free, in which all of us can live in peace."

This peace the President spoke of is actually a long way off. It is not something that is passed down from generation to generation. It will take time, for its steps will be slow. In fact, we, the class of '64, might not even see it gained, but it must begin now, tonight. As we sit here, we must examine the world around us. We must decide now what we are here for—what our purpose in life is. Then, after understanding the situation, our decision must be our goal.

Plainly, we have our work cut out for us. Our part in this country's peace may seem small, but large or small it fits into the puzzle and is as necessary as breath is to life. It will not be easy, but working for peace has never been easy. We will meet many in the course of the future who will be against us. But we must not be afraid to go alone to face the world. Our understanding will be our goal, and in our goal will be our peace. With the help of God and love for our country we will play a part in the never-ending battle for "peace through understanding."
